

Q10 List out any two difference between the include() and forward() methods with an appropriate example.

Ans. include()

- it includes the content of a resource (servlet, Jsp page, or HTML page) in the response.

- Response of second servlet is included in the response of that first servlet that is being sent to the client.

forward()

forward a request from a servlet to another resource (servlet, Jsp file, HTML file on the server).

Response of second servlet is sent to the client, response

Q20 List out ~~above~~ any two difference betⁿ forward() & sendRedirect() methods with an appropriate example

→ forward()

- The request is transferred to other resources within same server.

- It is a method which belongs to interface request Dispatcher.

sendRedirect()

- The request is transferred to other resource to different server.

- It is method which belongs to HttpServletResponse interface.
