Types of Firepits

December 21st, 2012

Firepits can create a beautiful ambience for your backyard. Firepits can be created in just about every area of your home; however backyard firepits are the most common. No matter what climate you live in your home will be able to benefit from a firepit.

Now you might be asking yourself how is a firepit built and do I need to set in on anything? The perfect addition to any firepit is a fire pit table. Fire pit tables can be made in different materials and patterns which will enable you to effortlessly blend your firepit and fire pit table in with your backyard landscape.

A very common type of fire pit table is the oriflame fire pit table. The major benefits of these fire pit tables and the reason that they have become so popular is because they are lightweight, portable, and completely original. These tables are made in the USA and you can get your very own, one of a kind fire pit table! A major benefit of these tables is that they are easy to assemble, most will take approximately ten minutes to put together and the assembly process does not require any tools.

Another popular option for fire pit tables are wood burning fire tables. These tend to be smaller tables, much as you would have end tables next to your couch in the family room. These are small fire pit tables that are generally made out wrought iron. Wood burning fire pit tables are a great way to keep your back patio warm in those cooler months.

Fire pit tables also have another great function that can add some interesting décor to your backyard or front yard. The smaller fire pit tables are commonly used to enhance the beauty of their gardens and landscaping. A firepit and a fire pit table can make a grand impression on guests and can really liven up your homes garden.

LINK FARM

- ✓ The concept of link farm is fairly old.
- ✓ Free For All sites are a thing of the past.
- ✓ A site could get thousand of useless backlinks with the click of a button.
- ✓ It boost the popularity of the submitted URL.
- ✓ A link farm is a website or a group of sites whose primary reason for existence is to cross-link between themselves and other website.

15

LINK FARM

16

CLOAKING

- ✓ On the arrival of any visitor, a website that employs cloaking checks the originating IP address to determine whether the visitor is a human or a web spider.
- ✓ Once this is determined, the page is served according to the type of visitor.
- ✓ Pages prepared for web spider are usually nonsensical collections of targeted keywords and keyword phrases.

WEB FEEDS AND SOCIAL BOOKMARKING

- Two technologies that web site visitors can use to access and promote content that they enjoy.
 - Web Feeds
 - Social Bookmarking

20

WEB FEEDS

- A **web feed (or news feed)** is a data format used for providing users with frequently updated content.
- It is a mechanism used to distribute content over the web in **standardized XML – based** format.
- It is used to distribute information automatically – to humans as well as other web sites.
- They make easy to read news, or recent blog posts, from his or her favorite sources.

21

WEB FEEDS

- It is good to provide some amount of your content in feed.
- Because the full content appearing on various sites may present **duplicate content problem**.
- **RSS (Really Simple Syndication)** and **Atom** are standardize format for web feed.

22

SOCIAL BOOKMARKING

- A social bookmarking service is a centralized online service which enables users to add, annotate, edit, and share bookmarks of web documents.
- Bookmarks can be **private** or **public**.
- When web page is bookmarked publically by many users, there are chances to increase ranking of that particular web page.

SITEMAPS

- ◆ A sitemap is a list of **pages/URLs** of a web site which is accessible to **crawlers and/or users**.
- ◆ Easy way for both humans & search engines to reference pages of your website from one **central location**.
- ◆ Useful to refer pages that are not linked anywhere else in a web site's navigation.
- ◆ Format of sitemaps file can be **HTML, XML** or **Text File**.

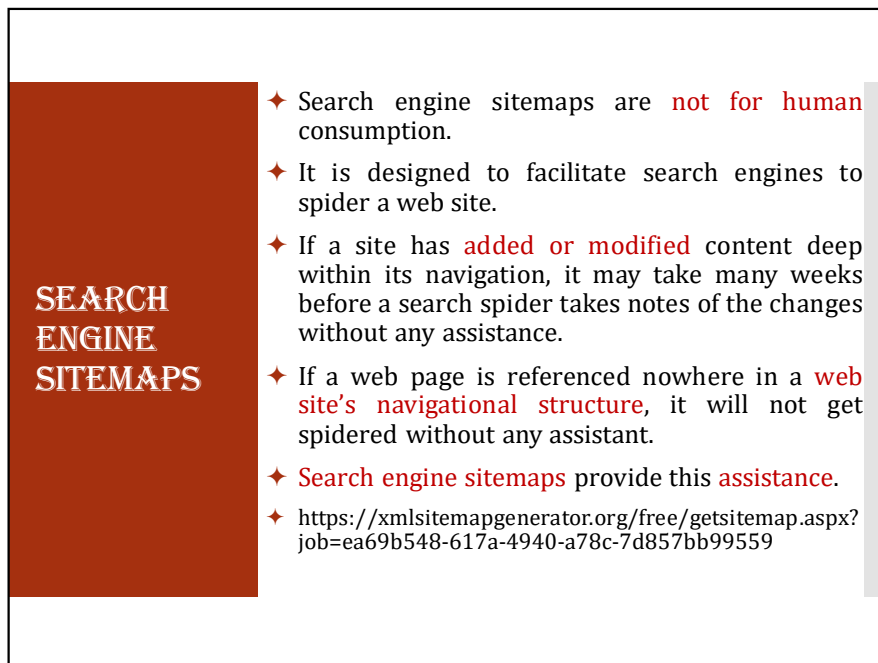

TRADITIONAL SITEMAPS

TRADITIONAL SITEMAPS

- ♦ Sitemaps are particularly beneficial when users can't reach all areas of a website through a browserable interface.
- ♦ The sitemap page should be linked to in the **navigation** or **footer** of every web page in your web site or at least on the **home page**.
- ♦ For larger sites, it is good to create **multiple-page sitemap**, partitioned into sections.
- ♦ Because it is recommended not having too many links on a single page.

SEARCH ENGINE SITEMAPS

- ♦ Search engine sitemaps are **not for human** consumption.
- ♦ It is designed to facilitate search engines to spider a web site.
- ♦ If a site has **added or modified** content deep within its navigation, it may take many weeks before a search spider takes notes of the changes without any assistance.
- ♦ If a web page is referenced nowhere in a **web site's navigational structure**, it will not get spidered without any assistance.
- ♦ **Search engine sitemaps** provide this **assistance**.
